

Decarbonisation Roadmap
NorthBridge Group ICT Service B.V.**Address:**

Laan van 's-Gravenmade 74
2495 AJ Den Haag
The Netherlands

1. Company Profile

NorthBridge Group ICT Service B.V. is an IT service provider specializing in managed IT services, private cloud, on-premises infrastructure, virtual desktop infrastructure (VDI), networking, and security solutions.

2. Commitment to Decarbonisation

NorthBridge is committed to reducing its environmental impact and contributing to global climate efforts, with a focus on efficient IT infrastructure and sustainable service delivery.

3. Current Environmental Impact

- Energy consumption in office and on-premises infrastructure
- Private cloud and data center usage
- Networking and security infrastructure
- Business travel and commuting
- Hardware lifecycle

4. Targets

- Reduce emissions by 20–30% within 3–5 years
- Improve energy efficiency across all IT layers

5. Measures

- Deployment of energy-efficient on-premises infrastructure
- Optimization of private cloud environments
- Use of sustainable data center facilities
- Network and security design focused on efficiency
- Virtualization and consolidation (VDI, server workloads)
- Remote work and reduced travel
- Responsible hardware lifecycle management and recycling

6. Monitoring

Annual review and continuous improvement of sustainability performance.
