

Statement on Product Carbon Footprint (PCF)
NorthBridge Group ICT Service B.V.**Address:**

Laan van 's-Gravenmade 74
2495 AJ Den Haag
The Netherlands

Introduction

NorthBridge Group ICT Service B.V. is a system integrator providing IT services, consulting, private cloud, on-premises infrastructure, networking, and security solutions.

Product Carbon Footprint (PCF)

As a service-oriented organization, NorthBridge does not manufacture physical products. Therefore, a traditional Product Carbon Footprint (PCF) calculation is not directly applicable to our core business activities.

Our services primarily consist of consultancy, integration, and management of IT environments. The environmental impact associated with these services is indirect and mainly related to infrastructure usage, energy consumption, and third-party data center providers.

Conclusion

At this time, NorthBridge Group ICT Service B.V. does not provide Product Carbon Footprint data for individual services, as this is not applicable in the context of our business model.

We remain committed to sustainability and continue to optimize our operations and partner selection to minimize environmental impact.
